Access Control by Altron Trading for Alisei Residence

Samaná, Dominican Republic

We are pleased to announce that Altron Trading Co has been selected by Alisei Residence and its developers Rocco Imke, S.A. as their Access Control provider for their new complex of Residences in Samaná, Dominican Republic.

For this project Rocco Imke, S.A. has selected a cutting edge technology for the security and access control solutions in the for hotel industry. This project required a very challenging solution, because it was necessary to use different products for the 1st floor from the ones for the 2nd and 3rd floor, choosing for the upper levels a Radio

Frequency Stand Alone Solutions, operated with Radio

Frequency Key that allows the guest to open the doors by

only reaching the lock with their keys, for the 1st floor they are using an access controller in order to open an electric door.

This solutions was totally customized to our customer needs in order to operate with the very same software to manage and control the access and security of the guests, their properties and facilities. Also they included a power saving device that will turn off all equipment of the rooms as soon as the guests leaves them.

About Altron Trading Co., It is a private leading enterprise founded in 1st quarter of 2005, the main sector of business is the Hotel Industry in Dominican Republic and Caribbean, the company specialized on going development of bilateral commerce between companies focusing on import and export of products and technologies for wide vary of industries such as, Hotel Industry, Construction Industry, Security, Home appliances and others.

About Alisei Residence: It is an amazing project under development in one of the most exquisite and beautiful coastline of the Dominican Republic and the Caribbean. This project will be home for the most demanding guest in search of peace and quiet, sitting in the middle of palm trees, in total harmony with ecosystem and a spectacular view of crystal and blue waters of the Atlantic Ocean.
